Subject: FCS definition for blanket bog

Hello [REDACTED]

I attach a revised version of the definition for blanket bog. The favourable values had been changed since sign-off a few years ago – to reflect revised split between heathland and blanket bog – so the revised definition was circulated to the TSG on 6th April. Although no member 'called-in' the definition for further discussion in a meeting, we did get a number of comments, particularly from [REDACTED] on the definition. These comments have now all been addressed.

I don't know whether you wanted to review the revised definition before we put it in the publication pipeline?

Best wishes,

[REDACTED]
